

DARBAAN
Where Tradition Meets
Technology

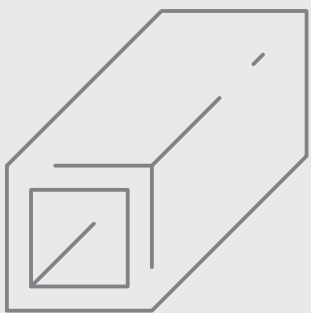

The new-age gatekeeper

Brassage is a name that's representative of centuries of trust and dependability. A name that embodies the essence of a protector, who has watched over us for generations. To bring the same sense of safety and security to modern homes, we introduce the Darbaan Digital Door Lock range.

For the first time in India, we are fusing digital security into a classic brass body. The unmatched aesthetics of Darbaan's sturdy brass frame is layered with the very essence of modernity and sophistication. Say good-bye to fumbling keys and anxious moments of uncertainty as Darbaan unlocks a world of convenience and assurance with a simple touch. It guards not only doors but also the very sanctity of what we hold dear—our homes, our families, our peace of mind.

The Epitome of Security

Keyless Entry:

Access is granted through fingerprint recognition, RFID Cards, PIN codes or remote unlock.

Enhanced Security:

Advanced encryption technology and anti-hacking measures.

User Access Control:

Administrators can easily add or remove authorized users.

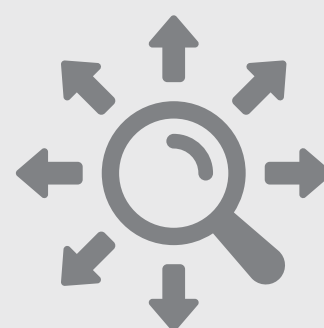

Easy Integration:

Fusing tech with architectural hardware to provide convenient access.

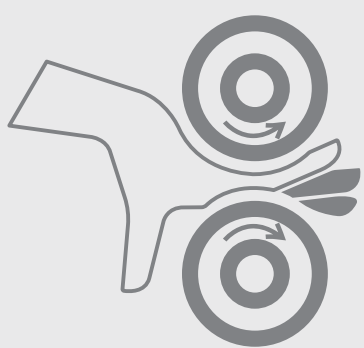

Easy to Install:

Designed for easy fittings on existing and conventional doors.

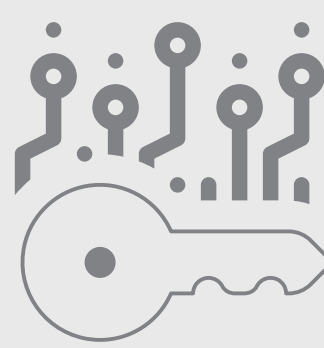

Data Tracking:

Keeps a record of when the lock is accessed for security and monitoring purposes.

Tamper Alerts:

Auto lock on multiple wrong attempts. An anti-burglar alarm goes on force openings.

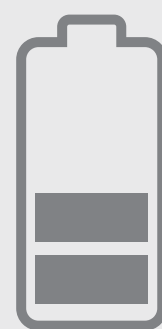

Emergency Access

Options: Mechanical keys or backup power sources can be used in case of power outages or technical issues.

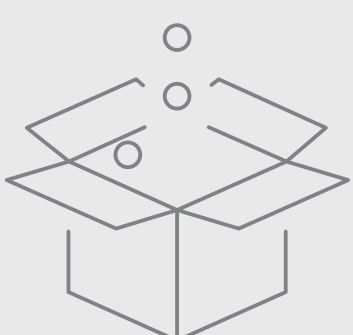

Energy Efficient:

Designed to extend battery life and reduce overall power consumption. Operates with 4 dry alkaline batteries.

Low Battery Indicator:

Notifies users when the lock's battery is running low, preventing unexpected lockouts.

Customizable Settings:

Multiple lock modes. Allows users to customize various settings and suit their specific needs.

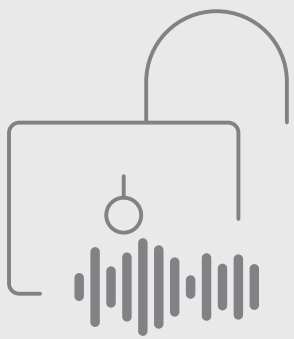

Unlock Mode:

Option to enable passage mode for the lock. Prevents door locking until disabled.
